

Write a 5 slide Powerpoint presentation on a topic from one of your first year courses. The presentation must include the following:

1. A title page with the topic and your name on it.
2. A slide which includes a figure of relevant data.
3. A slide which includes a schematic.
4. Appropriate references.
5. Animation from one slide to another.

In this assignment you will be marked on appropriateness of the presentation itself, not the content. (E.g. size of fonts in figures, amount of material per slide, use of colour, *etc.*)
